Recognising and Responding to Deterioration in Care Home Residents

Module 2 Dates: 13th August 14.00 pm
18th August 15.00 pm
19th August 15.00pm

Virtual training sessions via Zoom – log in details will be provided once registered.

To book a place, please contact Bradford & Craven CCG: Elaine.Phelps@bradford.nhs.uk Dates and times for Module 3 will be released shortly

Are you a care worker from a care home in Bradford & Craven? This course is for YOU!

This modular course will cover how to spot the early signs of deterioration and their clinical significance and will share some useful practical tools to take back and adopt in your care homes. Each training module will last approximately 40 minutes and we will provide you with a workbook which will include other useful information and a place where you can make notes.

RN's and home managers are encouraged to attend to become familiar with the tools and information being shared so you can support colleagues in their learning.

Module 1: Using Soft Signs to recognise deterioration
Module 2: Measuring vital signs
Module 3: Keeping residents safe through good communication & teamwork

Topics covered:
- **Why residents deteriorate.**
- **The key role carers play in early identification.**
- **How to recognise the soft signs of deterioration (using RESTORE2 Mini) and what to do if a resident becomes unwell.**
- **Practical guidance on measuring other vital signs such as Pulse, Temperature, Blood Glucose and their clinical significance.**
- **How to communicate effectively with the ambulance service, hospital, GPs and community teams.**
- **The importance of understanding how your team works together and how to improve on this.**

At the end of the course you will have the tools and skills to start to implement these ideas in your care homes with your colleagues.
