# **WE HAVE AN EXCITING TRAINING OPPORTUNITY FOR SERVICE MANAGERS AND TEAM LEADERS OF ANY SERVICES WHO SUPPORT VULNERABLE ADULTS.**

Details of the training course:

“Role of the Service Manager in Safeguarding Adults”

Training course is over 2 days, please see below for the dates:

**12<sup>th</sup> to 13<sup>th</sup> September**

**14<sup>th</sup> to 15<sup>th</sup> November**

Description of course below:

**This two-day , face -to -face** programme is aimed at managers and team leaders of any services who contribute to the care or support of adults at risk of abuse and neglect. This can include e.g. housing, education, advocacy and police as well as health and social care. We will explore the experiences and aspirations of adults with care and support needs and discuss practical implications and solutions for managers of services.

Using a range of facilitated discussions and interactive group exercises, participants will be encouraged to build on their existing knowledge and experience and to think about how learning can be applied to their particular service, role and responsibilities.

# SUPPORTING VULNERABLE PEOPLE BEFORE AND DURING A HEATWAVE: FOR HEALTH AND SOCIAL CARE PROFESSIONALS

Severe heat is dangerous to everyone. During a heatwave, when temperatures remain abnormally high over more than a couple of days, it can prove fatal. Please see the [GUIDANCE](#) for further information.

## BEAT THE HEAT: KEEP YOUR RESIDENTS HYDRATED AND AVOID DEHYDRATION AND ACUTE KIDNEY INJURY DURING THE HOT WEATHER

Summer is here and we are due to be enjoying some hot weather at the end of the week but it's also important to maintain hydration levels to ensure our health and wellbeing. This is especially true for frail, elderly people in hospitals or living in a care home and it is important that residents are supported to keep safe and well during the hot weather.

Over the next few days of hot weather we expect to see increasing admissions to Elderly Care Wards primarily due to a **degree of dehydration** and **acute kidney injury (AKI)** often presenting as **falls, generally 'off legs' and confusion.**

This will mainly be patients from residential and nursing homes and in residents on varying doses of diuretics (Furosemide, bendroflumethiazide etc.) or ACE inhibitors (ramipril, enalapril etc.).

Any resident with **any inter-current illness**- for example D&V, a UTI, chest infection, recent fall or reduced mobility is particularly susceptible and may develop **Dehydration and AKI**

**If you have any residents who are off colour and especially those on diuretics and ACE inhibitors**  
**Alert Immedicare (telemedicine) or**  
**Your GP practice at the weekly check in,**  
**who may consider reducing or stopping these medications for a few days**
