

Essential Training

The Tissue Viability Team are Supporting
Residential Care Homes with:

Skin Tear- First Aid Training

- **Skin Tear** training supports in upskilling carers to deliver **First Aid** to care home residents who present with a new skin tear; help your residents get the right care at the right time.
- The training covers skin integrity, anatomy and physiology, best practice guidance for skin tear management and the Skin tear pathway, tips around skin tear prevention and best care for looking after vulnerable skin.
- The skin tear pathway/supporting documentation will be supplied at the home manager's request (on completion of training).
- Best practice under ISTAP guidance.
- Dressing provision and replenishment is supplied by your District Nursing Team, with use monitored for audit purposes.

Please note, this training is **NOT** for registered nurses.

Please see table below for training dates and access links for each session.

Alternatively, to book **face to face** training please contact

carehometraining@bdct.nhs.uk
