

FREE fuel poverty training for health and social care practitioners (CPD-certified)

This short course will equip you to identify and help residents whose homes may be too cold for their health and well-being. It specifically responds to the recommendations of NICE Guideline 6 regarding the roles of health and social care practitioners in mitigating the health risks from cold homes.

It will cover:

- Identifying people at risk of ill health from living in a cold home
- Making every contact count by asking people about keeping safe, warm and well at home
- Helping people whose homes may be too cold, including signposting for further support
