

## **IMPORTANT: SERVICE UPDATE SYSTEM - VACCINATION PROGRAMME SUPPORT**

The Bradford Service Update System, which is hosted on the Connect to Support website, has been updated to include status updates for the rollout of the Vaccination Programme.

When you next log in to your profile, which is accessed through your service's unique URL and password, you will see that the text box has been cleared and the following questions, show below, have now been included. These new queries on your submission page will only allow numerical answers for the responses, any written responses or updates must be included within the text box near the top of your submission page.

**This information is vital in understanding the uptake of vaccinations throughout Social Care within the Bradford District. The Vaccination Programme states that all frontline staff, those that have contact with Service Users, should have received their first dose of the vaccine by the end of January 2021.**

You will have previously received your login details to this system, but if you require these again, please contact [connecttosupport@bradford.gov.uk](mailto:connecttosupport@bradford.gov.uk) for your unique URL and password.
