

Into Employment is a 12 month programme which aims to support people with disabilities into paid employment.

We work towards a Level 1 qualification in Preparing for Employment or Further Education and offer placement opportunities which match people's strengths, skills and dreams for their future.

Students are paid a bursary every 4 weeks to support their education.

You can apply for the programme with or without an EHCP.

Our learning approach is fun, practical and focused on the skills and behaviours people need to become work ready.

You will be supported by a Social Care contact and encouraged to have your voice heard and your strengths recognised.

We focus on improving self awareness, confidence as well as practical work related learning including applying for jobs, interviews and work related communication skills.

For more information and some videos of our students sharing their stories, please scan the QR Code below.
